HTML, CSS, Javascript

PROJECTS

Todos With Kanban ⧉
[React, Redux, Tailwind]
- An application used to simplify the process of making todos and also arranging your **todos with kanban board.** (Live Link) ⧉

QuickChat ⧉
[React, Nodejs, Socket.io, Tailwind]
- Video chat app using **react** and **nodejs**
- Making peer to peer connection by using **Socket.io**

Weather App ⧉
[React, Redux, Bootstrap]
- An application used to show weather updates based on user preference built with **React**.
- I wanted to build an application that allowed users to **pull data from the Weather API** based on what they were interested in, such as 'Temperature in delhi'.(Live Link) ⧉

WHITEBOARD ⧉
[HTML, CSS, Javascript, Bootstrap]
- Simple and easy to use whiteboard web app for drawing.
- this project was done by our team in a hackathon.(Live Link) ⧉
